

Titan Touch Outdoor Touch Screen Monitor

Weatherproof. Tamperproof. Tough!

CyberTouch's Titan is an indoor-outdoor integrated touch screen monitor designed to be mounted in either landscape or portrait format. Titan is offered in 24" to 65" diagonal sizes and is ideal for public and harsh-environment use.

The use-surface is protected by a tamper-proof, multi-layer safety glass designed to respond to finger, gloved-hands or die-electric styli. The Titan is designed to run 24/7 in the harshest of environments. The Titan utilizes resistive touch screen technology and communicates with a Mac or PC directly via USB or Serial port and it supports Windows, MAC and Linux operating Systems. Titan is compatible with most AV hardware and is plug-and-play with Crestron, Extron and AMX. A temperature- regulated heat/cool device maintains the internal temperature assuring safe operation of the monitor. The Titan is a turn-key, low-maintenance, heavy-use outdoor touch screen solution.

Titan is ideal for use in:
